Self Definition

I'd say I'm pretty easy-going, calm and bit of an introvert since I rarely talk about myself. But that doesn't mean I don't like being around people. I actually feel good knowing other people are comfortable around me.

Strength

The first strength that comes to my mind is curiosity. I love exploring the world out there and researching new things, especially technology. That's why I decide to pursue a career in IT. I'm also quite flexible. I can multitask and go with the flow even when a situation is out of my control. Another key strength is communication; building strong relationships with people in order to deliver the best results.

Recent Projects

MUSIC PLAYER

<https://github.com/RazvanAlexandru31/music-player>

Streaming music is a major activity people use the internet these days. For this reason, creating a media platform with a regular music player app features is great and fun project. In this project I've created a music player using HTML, CSS, JavaScript, and the HTML5 Audio API with which can play music on your browser.

MEMORY CARD GAME

<https://github.com/RazvanAlexandru31/memory-game>

A simple card game in which all of the cards are laid face down on a surface and two cards are flipped face up over each turn. This little project focuses on the fundamentals of React: components, props, and state.

GITHUB USERNAME SEARCH

<https://github.com/RazvanAlexandru31/github-search-user>

Github finder is a Fetch Api project where we can easily find a github user information by simply typing their username. This application shows user Profile, Followers, Following, Website/Blog, Repos and much more. Also it shows the latest 10 repository. Tailwind CSS was used for styling.
